NEW YORK, April 21.-Business on the stock exchange was very dull, but there was a rather firm undertone to during this short time the market and prices were steady. It was a case of a professional market without well defined indication of its robable course during the afternoon, although the morning market held re-markably well, after a rather poor

markably well, after a rather poor start, in which the Steel stocks and metals generally were decidedly soft. Some of the minor rails acted badly. These conditions prevailed up to well in the second hour of the morning, when the Steel stocks started the better feeling with a sharp rally to an actual advance over yesterday's closing, this being extended to a point recovery from a two-point loss in Republican Steel 2563. a two-point loss in Republican Steel 25@63.

a two-point loss in Republican Steel preferred.

At the same time, Reading and Union Pacific, after shading off, rallied a point, and did it without attracting much attention. At the same time the entire market was just about as dull as possible.

These are good times on the local Stock Exchange. The investment de-

Washington Railway common was not on the market until after the call, when a tender of twenty-five shares at 32 found a buyer; again and again the operation was repeated for a total of 100 shares. Then Mr. Hibbs, the purchaser, open-ily bid 22 for any part of 1,000 or 5,000 shares. Small sales of the preferred were made at 78 from an opening at 7614. This indicates the number of pounds of steam now under the local market. Enough and to spare, to spare, les of \$21,000 bonds of the Washing-

possible.

A shipment of \$500,000 gold to France, floods in the South, business depression, and political uncertainties keep the market very much neglected.

During the first hour of the afternoon and well into the second, the market maintained its abnormal duliness, relieved only by a well supported spurt in the Steel shares, and especially in Steel common. The market took all offered, and advanced the price steadily to 34%, and the preferred from the low point of the morning, 98, to a strong 99. Evidently the buying was by insiders who know more about the affairs of the corporation than any one else, or else by those who have faith in the wonderful organization that has so conservatively and ably managed this great combination.

The strength in Steel proved the influence necessary to check the declines Smelter. Copper, and to be illy Republic ifron and Steel. Copper gained %: Smelter, %, and other industrials fractionally, General Electric dropped 3 points, to 120.

Stock Exchange. The investment demand is excellent, the attendance of financial interests and brokers is very large and the volume of business good. It is a fact that members go on 'Change with many selling orders that they have little hope of executing because of the price limit only to find the market rising to meet their limits, and then passing on with but a little hesitation. Washington Gas was something of a leader this morning. The fact that there is a way by which the disposition of authorities against increased capitalization can be overcome, as indicated in this column yesterday, is apparently one of the causes for the steady advance in the stock. After much jockeying today, the stock sold at 625, an offer of stock at 63 brought as buyer, and this was repeated until 100 shares had been sold in twenty-five share lots, Mr. Hume was the chief
